

...our wee first meeting!

We love the work we do, and we believe that **we provide great specialist bipolar care** that it will be very difficult for you to find online or locally - even in a great academic centre.

We also understand that the programs we have available may appear too complex or daunting to understand just by reading our information sheets. Indeed, some of our first patients were Doctors and Professors. You don't have to be a Professor to benefit from our clinical care!

We want to make sure that you really know what we can do for you and how we may be able to help you.

Getting your bipolar care over the web may be new to you, so this would be your chance to see what it feels like, and whether it is right for you.

We also know that having the right "chemistry" with our team is vital for both of us to make this work. Maybe we will like each other, maybe we won't.

We can always try.

So if you want to meet with us, and to clarify any questions you may have, we are happy to provide **a first Bipolar Chemistry Meeting at no cost to you**. This is not going to be a [consultation or a clinical evaluation](#) of your condition, but more of a meeting where you briefly get to know us a bit better, and chat about our programmes and your concerns.

We can answer in detail all questions you may have about our clinical care and we can decide together what's good for you.

We know that you will respect our time and effort, and you will make the best use of your free Bipolar Chemistry Meeting.

We look forward to talking with you.
