

**BipolarLab's specialist care & programmes** cover the entire range of [Diagnosis](#) , [Treatment](#) , and [Training](#) of Bipolar disorder and recurrent depression.

The novelty in our approach is of course our **expertise and our singular focus on bipolar disorder and recurrent depression.** Our

commitment and use of

**research-based assessments**

throughout our programmes, and also the

**remote delivery**

of almost all our services via the internet and the telephone are also unique features of our service. Of course our beautiful

**local hubs**

are also easily accessible across different parts of Athens, Greece.

Finally, we take great pride in providing our services with gentleness and care, and as much as we can with humour.

We are proud of our **clinical work that delivers** important clinical outcomes such as a very **sm all number of hospital admissions, stable and quick recoveries from all bipolar episodes, few bipolar episodes, and better functioning outcomes** than most would expect.

Our effort to improve our work and clinical outcomes is ongoing.
